PROJECTS

Tasha and Josh's Invitation — *A Wedding Announcement Website*

https://github.com/CayleighLeishman/Wedding-project

Practiced CSS and gained a better understanding of how important layout and design is. Added pictures, created a navigation header, and attempted to learn GIS Mapping for the site. (Not implemented at this time.)

Flashcard — *Flashcard Math app*

https://github.com/jthieme/FlashCardApp

I created the setter and getter in the app, built my teammates up, and suggested ideas to implement plans. I learned about the consequences of data collection and how much work goes into it.

EDUCATION

Brigham Young University-Idaho, Rexburg, ID— *Computer Science Degree*

January 2021 - December 2025

Lethbridge College, Lethbridge, AB— *General Studies Degree*
